IN FORTHCOMING ISSUES

On multi-linear maximal operators along homogeneous curves
Lars Becker, Ben Krause

The plain sphere number of a link
Ryan Blair, Alexandra Kjuchukova, Ella Pfaff

On R-trees, homotopies, and covering maps
Jeremy Brazas, Gregory R. Conner, Paul Fabel, Curtis Kent

On the test properties of the Frobenius endomorphism
Olgur Celikbas, Arash Sadeghi, Yongwei Yao

Severi varieties on ruled surfaces over elliptic curves
Xiaotian Chang, Xi Chen, Adrian Zahariuc

Group topologies on groups of bi-absolutely continuous homeomorphisms
Javier de la Nuez González

The generic extension map and modular standard modules
Johannes Droschl

On symplectic automorphisms of a surface with genus two fibration and their action on CH_0
Jiabin Du, Wenfei Liu

Transverse minimal foliations on unit tangent bundles and applications
Sergio Fenley, Rafael Potrie

Interval rings
William Heinzer, K. Alan Loper, Bruce Olberding, Matthew Toeniskoetter

Non-braid positive hyperbolic L-space knots
Keisuke Himeno

Refined bounds for the eigenvalues of the Stokes operator
Zhengchao Ji, Türkay Yolcu

Spun normal surfaces in 3-manifolds II: toroidal case
Ensil Kang, J. Hyam Rubinstein

The class $\mathcal{Q}$ and mixture distributions with dominated continuous singular parts

Alexey A. Khartov

The Rankin-Selberg integral on $\mathrm{GSp}(2)$ for square free levels

Seiji Kuga, Masao Tsuzuki

Differentiable sphere theorems for compact submanifolds

Juan Li, Hongwei Xu, Entao Zhao

Data for Shimura varieties intersecting the Torelli locus

Wanlin Li, Elena Mantovan, Rachel Pries

Quasi-triangular and factorizable Poisson bialgebras

Yuanchang Lin, Dilei Lu

Sum of the squares of the Sp -character degrees

Nguyen N. Hung, J. Miquel Martínez, Gabriel Navarro

On the first eigenvalue of the Hodge Laplacian of submanifolds

Christos-Raent Onti

The derived series of GGS-groups

J. Moritz Petschick

Howe duality for the dual pair $SL_2(\mathbb{R}) \times F_{4,1}$:

A ping pong of KS -types

Gordan Savin

Property QT of relatively hierarchically hyperbolic groups

Bingxue Tao

Liouville theorems and new gradient estimates for positive solutions to $\Delta u + au^q = 0$ on a complete manifold

Youde Wang, Liqin Zhang

p -nuclearity of reduced group L_p -operator algebras

Zhen Wang

A higher rank analog of the strong openness property

Jingcao Wu

Symplectic semi-characteristics

Hao Zhuang
